

My interests from a young age surrounding PC gaming and technology in general are my main motivations for having chosen tech as a career path for myself! My drive for helping and bringing joy to others strongly motivates my pursuit of a career in tech, as it combines my interests in gaming and being able impact others in a positive way. I hope to learn as I develop and I am always looking forward to learning new things every day.

Tech Stack

- Python, JavaScript, SQL, HTML, CSS
- React, React Native, Vite, Bootstrap
